

The United States Army Corps of Engineers (USACE) Engineering Research and Development Center (ERDC) (<http://www.erdcd.usace.army.mil>) is one of the most diverse engineering and scientific research organizations in the world. Consisting of seven laboratories, ERDC conducts research and development in support of the soldier, military installations, and the Corps of Engineers civil works mission, as well as for other federal agencies, state and municipal authorities, and with U.S. industries through innovative work agreements. Internship opportunities exist within the Geotechnical and Structures Laboratory (GSL) at the Waterways Experiment Station (WES) in Vicksburg, Mississippi.

The Department of the Army does not discriminate against any employee or applicant for employment, because of sex, race, religion, color, or national origin. For more information, please see:
