**“Utilizing the Mudd Experience in a Career Managing Environmental Cleanups and Clients” by
Tim Wendler, HMC '89**

The Mudd experience can prepare you well for a career in environmental cleanup given its use of numerous technical disciplines including engineering, chemistry, and biology. More generally, as a consultant and program manager, you rely on additional communication, people management, and leadership skills that can be developed at Mudd.

Bio:

Tim Wendler graduated in 1989 from Harvey Mudd College with a BS in Engineering, and later earned a Masters in Civil/Environmental Engineering at Loyola Marymount University. Today, he is a national environmental investigation/cleanup client account manager for Chevron at Parsons Corporation, managing over \$8 Million in revenue/year. He has extensive project management experience overseeing remedial investigation/feasibility studies, remedial action plans, design, construction, remediation operations, Phase I and II environmental site assessment for sites with chlorinated solvents, heavy metals, and other impacts. He is a registered Civil Engineer in California and Arizona. Outside of work, he enjoys preserving natural open space as the President of the Arroyos & Foothills Conservancy.
